

<b>Title</b>	Illawarra Plant Community Type Vegetation Map, 2016. VIS_ID 4678
<b>Alternative title(s)</b>	IllawarraPCT_2016_E_4678
<b>Abstract</b>	This layer is a compilation of native vegetation mapping products in the Wollongong, Shellharbour and Kiama local government areas. The layer was originally compiled as a key dataset for input to the Illawarra Biodiversity Investment Opportunities Map (BIO Map). To compile the layer a series of previously existing maps were stitched together and map units assigned to NSW Plant Community Types (PCTs) as held in the BioNet Vegetation Classification database and incorporated into biobanking tools as at 31st December 2016. Map units have also been related to threatened ecological communities listed under the NSW TSC Act (1995) and the Commonwealth EPBC Act (1999) as at 31st December 2016. VIS_ID 4678

Name	ANZLIC Metadata Profile: An Australian/New Zealand Profile of AS/NZS ISO 19115:2005, Geographic information - Metadata
Version	1.1
Dataset URI	<a href="https://datasets.seed.nsw.gov.au/dataset/1bde317b-bca5-4fbf-9027-3ce0004677df">https://datasets.seed.nsw.gov.au/dataset/1bde317b-bca5-4fbf-9027-3ce0004677df</a>
Purpose	The purpose of this map product is to provide a single layer of vegetation mapping in Wollongong, Kiama and Shellharbour local government areas that has a consistent language of Plant Community Types (PCTs) and consistent identification of Threatened Ecological Communities (TECs). The map is designed to relate to the objectives of the OEH vegetation information systems and to assist users with the assessment of TECs. It is designed to be used in conjunction with other sources on native vegetation in the study area including existing literature, field investigations and TEC determinations. Precautions are required when using the TEC data; the mapping provides a guide only and does not preclude the need for individual assessment of TEC status at a site scale.
Status	completed
Spatial representation	
Type	vector
Spatial reference system	
Authority code	GDA94 Geographic (Lat\Long)
Code identifying the spatial reference system	4283
Equivalent scale	1:None
Additional information source	See technical document (unpublished) for field definitions and references.
Topic category	

Keyword set	
keyword value	BOUNDARIES-Biophysical ECOLOGY-Landscape FLORA-Native VEGETATION

Lineage	Linework derived from existing vegetation maps, supplemented by interpretation of ADS40 imagery. PCTs were aligned using analysis of systematic floristic site data, vegetation mapping, technical reports, and the BioNet Classification database. See technical document (unpublished) for summary.
