

<b>Title</b>	Bongil Bongil NP Floyds Grass Mapping. VIS ID 3857.
<b>Alternative title(s)</b>	BongilBongil_Floyds_VIS_3857
<b>Abstract</b>	Concise spatial delineation of Floyd's Grass ( <i>Alexfloydia repens</i> ) distribution in Bongil Bongil National Park (NP). VIS ID 3857.
<b>Resource locator</b>

#### Lineage

Each individual patch of Floyd's Grass was mapped by manually walking the perimeter with a hand held GPS recording the tracklog/boundary of each patch. Numerous local experts and sources were contacted for knowledge of distribution with each site locality advice explored. All other publicly accessible lands that indicated distribution were also investigated on foot. The dataset is very accurate and thorough up to all local knowledge of distribution. Spatial accuracy will vary in accordance with GPS quality. The boundaries were captured with a HP iPAQ handheld PC with a SirfStar III compact flash GPS card. Differential GPS was NOT used so accuracy is estimated between 10cm to 3 metres.

Scope dataset

### Completeness Commission

Date type revision

Effective date 2001-01-01

Explanation No systematic test performed The layer is complete with exceptions of new discoveries.

### Completeness Omission

Date type revision

Effective date 2001-01-01

Explanation No systematic test performed The layer is complete with exceptions of new discoveries.

### Conceptual Consistency

Explanation ESRI ArcInfo Topology validation. 'No gaps' and 'No overlap' rules applied. All topology is correct.

### Topological Consistency

Explanation ESRI ArcInfo Topology validation. 'No gaps' and 'No overlap' rules applied. All topology is correct.

### Absolute External Positional Accuracy

Explanation 10cm - 3 metres.

### Non Quantitative Attribute Accuracy

Explanation No systematic test performed Attribute accuracy is very good given its either presence or absence of a Floyds Grass patch. Attributes for this layer represent the external boundary of each Floyd's Grass patch. Isolated or prolific weed patches within Floyd's Grass were captured separately in both a spatial layer and also in field notes.
