

<b>Title</b>	State Environmental Planning Policy (Primary Production and Rural Development) 2019
<b>Alternative title(s)</b>	SEPP (Primary Production and Rural Development) 2019
<b>Abstract</b>	The data represents the land for State Environmental Planning Policy (Primary Production and Rural Development) 2019.
<b>Resource locator</b>

Version 1.1

Dataset URI <https://datasets.seed.nsw.gov.au/dataset/35d69ff2-dd1d-45ae-8ca8-db7698714e9e>

**Purpose** The aims of this Policy are as follows:(a) to facilitate the orderly economic use and development of lands for primary production,(b) to reduce land use conflict and sterilisation of rural land by balancing primary production, residential development and the protection of native vegetation, biodiversity and water resources,(c) to identify State significant agricultural land for the purpose of ensuring the ongoing viability of agriculture on that land, having regard to social, economic and environmental considerations,(d) to simplify the regulatory process for smaller-scale low risk artificial waterbodies, and routine maintenance of artificial water supply or drainage, in irrigation areas and districts, and for routine and emergency work in irrigation areas and districts,(e) to encourage sustainable agriculture, including sustainable aquaculture,(f) to require consideration of the effects of all proposed development in the State on oyster aquaculture,(g) to identify aquaculture that is to be treated as designated development using a well-defined and concise development assessment regime based on environment risks associated with site and operational factors.

Status completed

## Spatial representation

Type vector

Geometric Object Type surface

## Spatial reference system

Authority code GDA94 Geographic (Lat\Long)

Code identifying the spatial reference system 4283

Equivalent scale 1:None

## Lineage

This spatial dataset reflects the current planning legislation in NSW in particular the maps and legislation published on the NSW legislation website ([www.legislation.nsw.gov.au](http://www.legislation.nsw.gov.au)). The data production usually occurs in conjunction with the development of the Environmental Planning Instrument (EPI) it is connected to. Original data inputs are produced by Local Government or the Department according to map and data standards developed by the Department and published externally via the website. These data inputs are checked by data and cartographic staff as well as planning staff internally against the map and data standards as well as for accurate content. Once the planning instrument is notified, the input data will be incorporated into the relevant EPI datasets. The quality management processes involved in the data production to this point are routinely screened by internal and external auditors for certification under ISO 9001 - Quality Management Systems. At this point the various datasets are then combined into a new normalised data schema to suit the requirements of the online Planning Viewer. This occurs via various automated ETL processes. Although every care is taken in ETL processes to maintain accuracy sometimes differences between inputs and final normalised data can occur.
