

Name of dataset or data source:	NSW Department of Industry Opal Claims	
Custodian of the dataset or data source:	Department of Industry, Skills and Regional Development	
Description:	Current claims for opal exploration and production in the Lightning Ridge and White Cliffs districts of NSW	
Data quality rating:	<ul style="list-style-type: none"> - Institutional Environment ★ Accuracy - Coherence ★ Interpretability ★ Accessibility 	
INSTITUTIONAL ENVIRONMENT	MEDIUM	★
<ul style="list-style-type: none"> • The agency publishing this data is the recognised data custodian. • Data collection is mandated or required by Mining Act 1992 • Custodian has no commercial interest or conflict of interest in the data. 		
<ul style="list-style-type: none"> • Data is not collected or managed according to a data quality framework. • Data governance roles and responsibilities are not assigned for this dataset or data source. 		

ACCURACY**HIGH**

- This data has been subject to quality assurance processes. ie Checking for errors at each stage of data collection and processing, or verifying data entry and making corrections if necessary.
- The data collection met the objectives of the primary user. The data correctly represents what it was designed to measure, monitor or report. Refer to Scope and Coverage in the last section of this report for more information.
- There are no known gaps in the data. (For example: non-responses, missing records, data not collected.)
- There have not been any adjustments, changes or other factors that could impact the validity of the data. (For example: weighting, rounding, de-identification of data; changes or flaws in data collection or verification methods.)
- Revision policy: If errors are identified, data is revised and the revision is publicised

Find out more about the quality assurance processes from the Custodian.

COHERENCE**MEDIUM**

- Standard definitions, common concepts, classifications and data recording practices have been used.
 - Elements within the data can be meaningfully compared.
 - This data is generally consistent with similar or related data sources.
-
- This data is part of a time series. There have been significant changes in the way data items are defined, classified or counted since the start of the series.
 - This data may not be consistent with previous releases. There have been changes in methodology or external impacts since the last release in this series.

More information about standards: Standard map datums and projections are used.

More information about similar or related data sources: State government agencies across Australia produce equivalent data sets.

This dataset or data source is part of a time series.

Data was first collected or produced on 01/01/1905

Changes that could cause a break in the consistency of data items over time: Titles were granted under various mining acts over the years.

More information about changes or events which have impacted the data since the last release: The mapping of titles was carried out manually on hard copy plans. Title boundaries were maintained in a digital form from the early 1990's.

INTERPRETABILITY

MEDIUM

- Information is available about the primary data sources and methods of data collection. (For example: instruments, forms, instructions.)
- Information is available to help Users evaluate the accuracy of the data and any level of error.
- Information is available to explain concepts, help Users correctly interpret the data and understand how it can be used.
- Information is available to explain ambiguous or technical terms used in the data.

- There is no data dictionary available to explain the meaning of data elements, their origin, format and relationships.

Find out more about the primary data sources and methods of data collection from the Custodian (contact details below).

Find out more about how to evaluate the accuracy of the data and any level of error from the Custodian (contact details below).

Find out more about concepts used in this dataset and how to understand or interpret the data from the Custodian (contact details below).

Find out more about ambiguous or technical terms used in the data from the Custodian (contact details below).

ACCESSIBILITY

HIGH

- This dataset or data source is available online with an open licence –Attribution (CC BY)
- This dataset or data source is available in a machine-processable, structured format.
- This dataset or data source is available in a non-proprietary format.
- This dataset or data source is described using open standards and persistent identifiers.
- This dataset or data source is linked to other data, to provide context.

This dataset or data source is available in the following digital file types or formats: KML, Map, Web Service, Other, various GIS formats

Additional information about the use of identifiers and links to other data: The data set is a visual representation of current mineral tenure. The NSW Titles Administration System is the statutory register of mineral tenements in New South Wales.

Information to help users evaluate relevance

Scope & Coverage:

What the data was designed to measure, monitor, or report: Areas of New South Wales over which a company or individual has the right to explore for, or extract one or more resource commodities.

Target of the data collection: The information shows the current state opal exploration and production in New South Wales.

There were no individuals, groups or occurrences excluded from the data collection.

Geographic detail:

Data cover the following geographic area(s): State

Outputs:

The data are available as: Analytical (structured content, aggregated or derived information), Published (unstructured content, assembled into a form suitable for wide dissemination)

Other cautions:

The data does not represent or cover: n/a

Other cautions or recommendations to enable effective use and interpretation of the data: This compilation of information is derived from plans of varying quality submitted by third parties. The Department of Industry makes no statement, representation or warranty that this information is complete, accurate or free from error.

Reference period:

Period for which the data were obtained: 01/01/1905 - 30/06/2016

There were no exceptions to the data collection or observation period. (eg delays in receipt of data, changes to recording processes)

Timing:

Updates and revisions: If errors are identified, data is revised and the revision is publicised

The data became available (ie released or published) on: 01/01/1992

Frequency of production:

Data is collected or expected to be produced: Daily

DATA DISCLAIMER

NSW Government is committed to producing data that is accurate, complete and useful. Notwithstanding its commitment to data quality, NSW Government gives no warranty as to the fitness of this data for a particular purpose. While every effort is made to ensure data quality, the data is provided "as is". The burden for fitness of the data relies completely with the User. NSW Government shall not be held liable for improper or incorrect use of the data.

Understanding the Data Quality Statement

The data quality statement aims to help you understand how a particular dataset could be used and whether it can be compared with other, similar datasets. It provides a description of the characteristics of the data to help you decide whether the data will be fit for your specific purpose.

About the data quality rating:

The reporting questionnaire asks five questions for each of these data quality dimensions:

- Institutional Environment
- Accuracy
- Coherence
- Interpretability
- Accessibility

For each question: “yes” = 1 point; “no” = 0 points

The number of points determines the Quality Level for each dimension (high, medium, low).

Only dimensions with four or five points receive a star.

Points	Quality Level	Star / No Star
0	LOW	No Star
1	LOW	No Star
2	LOW	No Star
3	MEDIUM	No Star
4	MEDIUM	Star
5	HIGH	Star

More information?

Find out more about the data quality dimensions, the reporting questionnaire and the star rating in the NSW Government Standard for Data Quality Reporting published at: <http://finance.nsw.gov.au/ict/data-interopability-standards>

Evaluating data quality

Quality relates to the data's "fitness for purpose". Users can make different assessments about the quality of the same data, depending on their "purpose" or the way they plan to use the data.

The following questions may help you evaluate data quality for your requirements. This list is not exhaustive. Generate your own questions to assess data quality according to your specific needs and environment.

- What was the primary purpose or aim for collecting the data?
- How well does the coverage (and exclusions) match your needs?
- How useful are these data at small levels of geography?
- Does the population presented by the data match your needs?
- To what extent does the method of data collection seem appropriate for the information being gathered?
- Have standard classifications (eg industry or occupation classifications) been used in the collection of the data? If not, why? Does this affect the ability to compare or bring together data from different sources?
- Have rates and percentages been calculated consistently throughout the data?
- Is there a time difference between your reference period, and the reference period of the data?
- What is the gap of time between the reference period (when the data were collected) and the release date of the data?
- Will there be subsequent surveys or data collection exercises for this topic?
- Are there likely to be updates or revisions to the data after official release?
