

Title	Environmental Planning Instrument - Native Vegetation Protection
Alternative title(s)	EPI - Native Veg Protection
Abstract	The dataset contains Native Veg Protection for the Environmental Planning Instrument.
Resource locator

Unique resource identifier	
Code	6254aee8-4ce0-4095-b935-cde91f425e0f
Presentation form	mapDigital
Edition	1
Dataset language	eng
Metadata standard	
Name	ANZLIC Metadata Profile: An Australian/New Zealand Profile of AS/NZS ISO 19115:2005, Geographic information - Metadata
Version	1.1
Dataset URI	https://datasets.seed.nsw.gov.au/dataset/6254aee8-4ce0-4095-b935-cde91f425e0f
Purpose	This Policy aims to encourage the proper conservation and management of areas of native vegetation:(a) by requiring the preparation of plans of management before development consent can be granted in relation to areas of native vegetation, and (b) by encouraging the identification of areas of native vegetation, and (c) by encouraging the inclusion of native vegetation areas of in environment protection zones.
Status	completed

Spatial representation

Type vector

Geometric Object Type surface

Spatial reference system

Authority code GDA94 Geographic (Lat\Long)

Code identifying the spatial reference system 4283

Equivalent scale 1:None

Topic category Environment

Keyword set

keyword value HUMAN-ENVIRONMENT-Planning

Originating controlled vocabulary

Title ANZLIC Search Words

Reference date 2008-05-16

Geographic location

West bounding longitude 141

East bounding longitude 154

North bounding latitude -37

South bounding latitude -28

Vertical extent information

Minimum value -100

Maximum value 2228

Coordinate reference system

Authority code urn:ogc:def:cs:EPSG::

Code identifying the coordinate reference system 5711

Temporal extent

Begin position 2008-12-05

End position N/A

Lineage This spatial dataset reflects the current planning legislation in NSW in particular the maps and legislation published on the NSW legislation website (www.legislation.nsw.gov.au). The data production usually occurs in conjunction with the development of the Environmental Planning Instrument (EPI) it is connected to. Original data inputs are produced by Local Government or the Department according to map and data standards developed by the Department and published externally via the website. These data inputs are checked by data and cartographic staff as well as planning staff internally against the map and data standards as well as for accurate content. Once the planning instrument is notified, the input data will be incorporated into the relevant EPI datasets. The quality management processes involved in the data production to this point are routinely screened by internal and external auditors for certification under ISO 9001 - Quality Management Systems. At this point the various datasets are then combined into a new normalised data schema to suit the requirements of the online Planning Viewer. This occurs via various automated ETL processes. Although every care is taken in ETL processes to maintain accuracy sometimes differences between inputs and final normalised data can occur.
