

This document, known as **Metadata and Data Quality Statement** is effectively a Part B document which describes files and Metadata associated with an Asset. This metadata and data quality statement describes the key information to accompany a dataset so that it may be discovered, understood, used and the quality known and assured.

Instructions: Please populate this document as much as possible and save out this word doc file using the words MetadataStatement and then followed by the Asset Name.

For Example: *MetadataStatement_MurrumbidgeeGPWAR.docx*

Info Asset Details

Enter information about the resource you are attaching to your asset record	
<u>Name</u>	Namoi annual general purpose water accounting report
<u>Description</u>	Hyperlink to report on DPE water accounting web page.
<u>Format</u>	PDF
Publish resource as <u>open</u> data?	YES

Scope, coverage and geography

Enter information about the scope, coverage and geography of the Asset(s)	The report draws on Namoi hydrometric and licence account data to provide understanding of the water available for use at the start of the reporting period, and water remaining in accounts at the end of the reporting period. It includes credit and debit transactions against each account across the reporting period.
Title describing the files:	Namoi water accounting annual report

Accuracy and Error

Enter information about the Output and Interpretation

It is important to recognise that the data used to account for water movement and management in the Namoi has been obtained from a variety of sources and systems. The data ranges from observed values where a high accuracy would be anticipated through to modelled results and estimates where accuracy can be highly variable depending on a range of factors.

To address the inconsistencies in accuracy and prevent misuse of the data in the accounts, all figures in the water accounting statements are accompanied by an assessment of accuracy as defined in the table below.

Water account data accuracy estimates key
A = +/- 10%
B = +/- 25%
C = +/- 50%
D = +/- 100%

In addition to an accuracy code each figure in the accounts is cross-referenced where appropriate to a numerically linked note where detailed information can be found relating to that figure.

The notes form part of the disclosures of this GPWAR. The information contained in the notes is reported according to the following structure:

- Brief description
- Data type
- Policy
- Data accuracy
- Providing agency
- Data source
- Methodology
- Additional information (if applicable)
