

Title	Repealed - State Environmental Planning Policy (Building Sustainability Index: BASIX) 2004
Alternative title(s)	SEPP (Building Sustainability Index: BASIX) 2004
Abstract	<p>This State Environmental Planning Policy was repealed on 30 September 2023 and has been superseded by the State Environmental Planning Policy (Sustainable Buildings) 2022.</p> <p>Click here to go to the State Environmental Planning Policy (Sustainable Buildings) 2022 Open Data page: https://www.planningportal.nsw.gov.au/opendata/dataset/state-environmental-planning-policy-sustainable-buildings-2022</p> <p>This historical record represents BASIX for State Environmental Planning Policy. The data and resource links may not be valid.</p>

Purpose	(1) Regulations under the Act have established a scheme to encourage sustainable residential development (the BASIX scheme) under which: (a) an application for a development consent, complying development certificate or construction certificate in relation to certain kinds of residential development must be accompanied by a list of commitments by the applicant as to the manner in which the development will be carried out, and (b) the carrying out of residential development pursuant to the resulting development consent, complying development certificate or construction certificate will be subject to a condition requiring such commitments to be fulfilled. (2) The aim of this "Policy" is to ensure consistency in the implementation of the BASIX scheme throughout the "State".(3) This "Policy" achieves its aim by overriding provisions of other "environmental" "planning instruments and development control plans that would otherwise add to, subtract from or modify any obligations arising under the BASIX scheme.

Lineage

This spatial dataset reflects the current planning legislation in NSW in particular the maps and legislation published on the NSW legislation website (www.legislation.nsw.gov.au). The data production usually occurs in conjunction with the development of the Environmental Planning Instrument (EPI) it is connected to. Original data inputs are produced by Local Government or the Department according to map and data standards developed by the Department and published externally via the website. These data inputs are checked by data and cartographic staff as well as planning staff internally against the map and data standards as well as for accurate content. Once the planning instrument is notified, the input data will be incorporated into the relevant EPI datasets. The quality management processes involved in the data production to this point are routinely screened by internal and external auditors for certification under ISO 9001 - Quality Management Systems. At this point the various datasets are then combined into a new normalised data schema to suit the requirements of the online Planning Viewer. This occurs via various automated ETL processes. Although every care is taken in ETL processes to maintain accuracy sometimes differences between inputs and final normalised data can occur.
