

Presentation form	documentDigital
Edition	01/02/2007
Dataset language	eng
<b>Metadata standard</b>	
Name	ANZLIC Metadata Profile: An Australian/New Zealand Profile of AS/NZS ISO 19115:2005, Geographic information - Metadata
Version	1.1
Dataset URI	<a href="https://datasets.seed.nsw.gov.au/dataset/83677d18-3b58-4111-995c-055e964434ce">https://datasets.seed.nsw.gov.au/dataset/83677d18-3b58-4111-995c-055e964434ce</a>
Purpose	The Biodiversity Conservation Lands is the primary source of OEH contribution to regional planning. Biodiversity forecasting tools have also been developed by OEH to support regional planning. They can contribute to ;increasing the value of existing mapped layers, comparing alternative development or conservation scenarios, and;assessing planning documents against biodiversity indicators
Status	completed
<b>Spatial representation</b>	
Type	vector
<b>Spatial reference system</b>	
Authority code	GDA94 Geographic (Lat\Long)
Code identifying the spatial reference system	4283
Equivalent scale	1:None
Additional information source	Regional Coastal Planning - Far North Coast ; Metadata for Conservation Constraints Mapping 2007
<b>Topic category</b>	
<b>Keyword set</b>	
keyword value	<p>ECOLOGY-Landscape</p> <p>FORESTS-Natural</p> <p>HERITAGE-Natural</p> <p>HUMAN-ENVIRONMENT-Planning</p> <p>LAND-Use</p> <p>VEGETATION</p>
<b>Originating controlled vocabulary</b>	
Title	ANZLIC Search Words
Reference date	2008-05-16

<b>Geographic location</b>	
West bounding longitude	152.674
East bounding longitude	153.7915
North bounding latitude	-29.255
South bounding latitude	-28.1003
<b>Vertical extent information</b>	
Minimum value	-100
Maximum value	2228
<b>Coordinate reference system</b>	
Authority code	urn:ogc:def:cs:EPSG::
Code identifying the coordinate reference system	5711
<b>Temporal extent</b>	
Begin position	2007-01-02
End position	N/A
<b>Dataset reference date</b>	
Date type	publication
Effective date	2012-05-14
Date type	revision
Effective date	2010-04-23
<b>Resource maintenance</b>	
Maintenance and update frequency	None

**Lineage** Methods; Due to the complexity of overlaying datasets to create a single Biodiversity Conservation Lands layer, component datasets were simplified by dissolving all internal linework. Information on the type of constraint has been retained, however, details on attribution within constraints has not been included. ; Each attribute was prepared as a separate shapefile and these are listed, along with a brief description in Table 1. The layers were processed as follows; \* an attribute was added to tag the shapes with the name of the constraint, ; \* all internal linework was dissolved based on the attribute tag; \* all component attributes were joined into a single data layer using ArcInfo Workstation (union and identity); \* an attribute was added for significance, this was assigned to local, regional or state on the basis of the highest level of significance in a polygon. For example, a polygon with significance for both State and Regional features would carry an overall tag for State significance (the highest significance). ; \* In cases where State and Regional significance has been given to an area of the landscape which is a cleared habitat corridor (ie a Habitat Corridor with no other significance), this is denoted in the attribute field as 'State - Cleared Corridor' or 'Regional - Cleared Corridor'.; \* Areas of NPWS estate and areas of Forests NSW estate are displayed explicitly. ; ; Scale and limitations of the use of conservation constraints; Limited time and resources were available for the compilation of the Biodiversity Conservation Lands dataset. In addition, there is a recognition that for certain features, particularly vegetation communities, the baseline dataset used was designed for regional scale significance assessments. While these data may provide an indication of relative biodiversity significance at the local level, users should be aware that the data have limitations including those of scale (mainly 1:25,000 aerial photography) and age (extant updated to 2002).
