

Title	NSW State Vegetation Type Map
Abstract	<p><b>Current Extent</b></p> <p>The State Vegetation Type Map (SVTM) is a regional-scale map of NSW Plant Community Types. This map represents the current extent of each Plant Community Type, Vegetation Class and Vegetation Formation, across all tenures in NSW. This map is updated periodically as part of the <a href="#">Integrated BioNet Vegetation Data</a> program to improve quality and alignment to the NSW vegetation classification hierarchy.</p> <p>An SVTM pre-clearing PCT map is available <a href="#">here</a>.</p> <p>Further information about the mapping methods is available from the <a href="#">State Vegetation Type Mapping Program Page</a></p> <p><b>Current Release C2.0M2.0 (December 2023)</b></p> <p>This release includes revisions, using the most recent NSW PCT Classification Master list (represented by “C2.0” in the version release number). PCT spatial distributions were manually edited based on user and community feedback since the previous C1.1.M1.1 release. In addition, changes were made to the Native Vegetation Extent mask which is used to create the Native Extent map.</p> <p>Detailed technical information is available <a href="#">here</a>.</p> <p><b>Data Access</b></p> <p>Map data may be downloaded, viewed within the SEED Map Viewer, or accessed via the underlying ArcGIS REST Services or WMS for integration in GIS or business applications.</p> <p>The Trees Near Me NSW app provides quick access to view the map using a mobile device or desktop. Download the app from Google Play or the App Store, or access the web site at <a href="https://treesnearme.app">https://treesnearme.app</a>.</p> <p><b>Map Data Type</b></p> <p>The map is supplied as ESRI Feature Class (Quickview) and 5m GeoTiff Raster, and can be viewed and analysed in most commercial and open-source spatial software packages. If you prefer to use the download package, we supply an ArcGIS v10.4 mxd and/or a layer file for suggested symbology. The raster attributes contain PCT, Vegetation Class and Vegetation Formation.</p> <p><b>Feedback and Support</b></p> <p>We welcome your feedback to assist us in continuously improving our products. To help us track and process your feedback, please use the SEED Data Feedback tool available via the SEED map viewer.</p> <p>For further support, contact the BioNet Team at <a href="mailto:bionet@environment.nsw.gov.au">bionet@environment.nsw.gov.au</a>.</p> <p><b>Useful Related Data</b></p> <p><a href="#">NSW BioNet Flora Survey Plots – PCT Reference Sites</a>: full floristic plots used in the development of the quantitative Plant Community Type (PCT) classification. Currently available for eastern NSW PCTs version C2.0.</p> <p><a href="#">NSW State Vegetation Type Map - technical notes</a></p> <p><a href="#">Eastern NSW - percentage cleared calculation technical notes</a>.</p>

Description:

SEED Web Map Service (WMS) including a combination of both: State Vegetation Type Map (Extant), and BioNet Flora Survey – PCT Reference Sites

Function: download

[ArcGIS REST SERVICE - NSW State Vegetation Type Map \(Extant\)](#)

Name: ArcGIS REST SERVICE - NSW State Vegetation Type Map (Extant)

Protocol: WWW:DOWNLOAD-1.0-http--download

Description:

An ArcGIS Server web service represents a GIS resource—such as a map, locator, or image—that is located on an ArcGIS Server site and is made available to client applications. Depending on the layers enabled, this web service allows a user to query its features and/or visualise the dataset. This service is aimed at advanced geographical information users, and will require access to geographical information system (GIS) software such as ArcGIS/ArcMap.

Function: download

[Technical Report](#)

Name: Technical Report

Protocol: WWW:DOWNLOAD-1.0-http--download

Description:

NSW SVTM Technical Notes

Function: download

[How to use BioNet Web Map Services](#)

Name: How to use BioNet Web Map Services

Protocol: WWW:DOWNLOAD-1.0-http--download

Description:

This document provides advice to novice and technical users on how to use and get the most out of map data services and web map browsers

Function: download

[NSW State Vegetation Type Map Program](#)

Name: NSW State Vegetation Type Map Program

Protocol: WWW:DOWNLOAD-1.0-http--download

Description:

SVTM summary and methodology

Function: download

[Download Package](#)

Name: Download Package

Protocol: WWW:DOWNLOAD-1.0-http--download

Description:

SVTM NSW Extant PCT Quickview (Vector Data - Geodatabase Format) and SVTM NSW Extant PCT 5m (Raster Data - TIFF format) 13.7GB zipped and 16.5GB unzipped

Function: download

**Lineage** This map was developed under the State Vegetation Type Map (SVTM) program and includes the first comprehensive Eastern NSW PCT map using the NSW Revised PCT Classification. Map methodologies for the for SVTM program are summarised here:

[NSW Office of Environment and Heritage 2017, The NSW State Vegetation Type Map: Methodology for a regional-scale map of NSW plant community types, NSW Office of Environment and Heritage, Sydney, Australia](#)
