Assessment of the TEC of the Coastal Integrated Forestry Operations Approval Title Abstract The assessment area in this report includes all Crown Forest estate situated within the boundaries of the Upper North East, Lower North East, Southern and Eden Integrated Forestry Operations Approval (IFOA) regions. A total of 315 state forests were included. Additionally, Crown Forests situated within the Central Tablelands area comprising part of the Bathurst and Mudgee forest management areas are also included in the assessment area. These forests are not covered by an IFOA but are identified for assessment for the purposes of this report. Resource locator **Data Quality** Name: Data Quality Statement Statement Protocol: WWW:DOWNLOAD-1.0-http--download Description: NSW Government standards direct that data should be made available with a statement regarding its quality, a so-called "Data Quality statement (DQS)", to enable potential users to determine whether the data is suitable for their requirements. Function: download Name: Assessment of the TEC of the Coastal Integrated Operations Approval Region Assessment of the TEC of the Protocol: WWW:DOWNLOAD-1.0-http--download <u>Coastal</u> <u>Integrated</u> Description: **Operations** Report on the Assessment of the TEC of the Coastal Integrated Operations Approval **Approval Region** Region Function: download Name: Operational and Indicative Maps for the Assessment of Threatened Ecological Operational and Communities on NSW Crown Forest Estate **Indicative Maps** for the Protocol: WWW:DOWNLOAD-1.0-http--download Assessment of **Threatened** Description: **Ecological** ESRI ArcGIS Layer File - Operational and Indicative Maps for the Assessment of Communities on Threatened Ecological Communities on NSW Crown Forest Estate **NSW Crown** Forest Estate Function: download Name: Native Forestry Map Viewer **Native Forestry** Map Viewer Protocol: WWW:DOWNLOAD-1.0-http--download Description: The EPA Native Forestry Map Viewer enables users to view our Koala and Threatened Ecological Community mapping without the need to access a GIS system. The map viewer allows users to perform searches to locate areas of interest and export resulting map views into various image file formats.
