

<b>Title</b>	Biolandscapes, South Western Slopes, Lachlan Extant. VIS_ID 4124
<b>Alternative title(s)</b>	SWS_LachlanBiolandscapes_E_4124
<b>Abstract</b>	The dataset shows the extant native vegetation as vegetation communities in relation to soil parent material, for an adjusted area of the NSW South Western Slopes (NSS) IBRA bioregion within the Murray, Murrumbidgee and Lachlan CMAs. VIS_ID 4124

## Lineage

The dataset was created using a composite vegetation layer created for Part 4-6 of the report: "The Native Vegetation of the Southern Wheat-Sheep Belt", NSW Department of Environment and Climate Change, June 2007. See report for further discussion of the biolandscape concept.

The composite vegetation data was combined with data for geology/soil parent material. The purpose of this is to delineate disjunctions in vegetation assemblages as they occur in unique, intergrading complexes with boundaries defined by soil parent material. For information on source data, see Table 4 in the report Part 4.

For further information about the composite vegetation data, see also the metadata for the Murray and Murrumbidgee pre1750 and extant datasets, and the report parts 2-3. Further information is also available in the metadata statement: "Combined Vegetation Layer for Murrumbidgee Region", Wil Allen, 12 June 2007

For Lachlan, the dataset uses the vegetation mapping layer provided by the Lachlan CMA. The report for this data is: "Reconstructed and Extant Distribution of Native Vegetation in the Lachlan Catchment", Department of Environment and Conservation, Information and Assessment Section, North-West Branch, Dubbo. May, 2006

### Attribute fields:

- FID: Internal feature number
- Shape: Feature geometry
- VEG\_LNDSCP: The combination of geology/soil parent material and vegetation class (as it occurs in the CLASS-field).
- SOURCE\_FLE: Source dataset of record; see also report Table 4 in Part 5.
- ORGNL\_POLY: Code carried over from geological mapping sources
- Min\_Bvt\_la: The vegetation community
- Min\_Keith\_: The vegetation class
- Min\_Keith1: The vegetation formation
- Min\_Label\_: Source dataset of record
- Min\_Source: Source dataset of record
- Source\_072: The original regional vegetation mapping source of the record
- Veg\_id\_072: The original vegetation code given in the source mapping
- Label\_092: The new vegetation community name (PVP type) from composite regional vegetation map
- Dk\_no2: The vegetation class code (Keith)
- Dk\_name2: The vegetation class name (Keith)
- Dk\_broad2: The broad vegetation group name (Keith)
- Dk\_no\_nam2: The vegetation class number and name (Keith)
- CLASS: The vegetation class name adopted for the report (consistent with Lachlan class names)
- Area\_Ha: Hectares
