

Title	Environmental Planning Instrument - Lease Area
Alternative title(s)	EPI - Lease Area
Abstract	The spatial data represents Lease Area for Environmental Planning Instrument.
Resource locator	
Data Quality Statement	Name: Data Quality Statement Protocol: WWW:DOWNLOAD-1.0-http--download Description: Data quality statement for State Environmental Planning Policy (Three Ports) 2013 Function: download
ArcGIS REST Services Directory - Lease Area	Name: ArcGIS REST Services Directory - Lease Area Protocol: WWW:DOWNLOAD-1.0-http--download Description: This service exposes the EPI for Lease Area Function: download
JSON - Lease Area	Name: JSON - Lease Area Protocol: WWW:DOWNLOAD-1.0-http--download Description: This service exposes the EPI for Lease Area Function: download
Unique resource identifier	
Code	c24cd02c-d368-4893-8cca-26b138994fa6
Presentation form	mapDigital
Edition	1
Dataset language	eng
Metadata standard	
Name	ANZLIC Metadata Profile: An Australian/New Zealand Profile of AS/NZS ISO 19115:2005, Geographic information - Metadata
Version	1.1
Dataset URI	https://datasets.seed.nsw.gov.au/dataset/c24cd02c-d368-4893-8cca-26b138994fa6
Purpose	The aims of this Policy are as follows:(a) to provide a consistent planning regime for the development and delivery of infrastructure on land ,(b) to allow the efficient development, re-development and protection of land,(c) to identify certain development within the Lease Area as exempt development or complying development,(d) to specify matters to be considered in determining whether to grant consent to development adjacent to lease area,(e) to provide for development that does not, by its nature or scale, constitute an actual or potential obstruction or hazard to aircraft,(f) to identify certain development as State significant development or State significant infrastructure,(g) to ensure that land around the Lease Area is maintained for port-related and industrial uses, including heavy industry on land.

Status	completed
Spatial representation	
Type	vector
Spatial reference system	
Authority code	GDA94 Geographic (Lat\Long)
Code identifying the spatial reference system	4283
Equivalent scale	1:None
Topic category	

Keyword set	
keyword value	HUMAN-ENVIRONMENT-Planning
Originating controlled vocabulary	
Title	ANZLIC Search Words
Reference date	2008-05-16
Geographic location	
West bounding longitude	141
East bounding longitude	154
North bounding latitude	-37
South bounding latitude	-28
Vertical extent information	
Minimum value	-100
Maximum value	2228
Coordinate reference system	
Authority code	urn:ogc:def:cs:EPSG::
Code identifying the coordinate reference system	5711
Temporal extent	
Begin position	2018-03-23
End position	N/A
Dataset reference date	
Resource maintenance	
Maintenance and update frequency	None

Lineage

This spatial dataset reflects the current planning legislation in NSW in particular the maps and legislation published on the NSW legislation website (www.legislation.nsw.gov.au). The data production usually occurs in conjunction with the development of the Environmental Planning Instrument (EPI) it is connected to. Original data inputs are produced by Local Government or the Department according to map and data standards developed by the Department and published externally via the website. These data inputs are checked by data and cartographic staff as well as planning staff internally against the map and data standards as well as for accurate content. Once the planning instrument is notified, the input data will be incorporated into the relevant EPI datasets. The quality management processes involved in the data production to this point are routinely screened by internal and external auditors for certification under ISO 9001 - Quality Management Systems. At this point the various datasets are then combined into a new normalised data schema to suit the requirements of the online Planning Viewer. This occurs via various automated ETL processes. Although every care is taken in ETL processes to maintain accuracy sometimes differences between inputs and final normalised data can occur.
