

### FCNSW Harvesting and Fire Data - Disclaimer

The information contained in this data package is provided by the Forestry Corporation of NSW (**FCNSW**) in good faith. FCNSW has attempted to make the information and data as accurate as possible, the information is provided in good faith without any express or implied warranty. There is no guarantee given as to the accuracy or currency of any information or data. Known limits on the accuracy include but are not limited to the following:

- The harvesting and fire data should be considered as indicative only due to the highly variable nature of historical mapping.
- The harvesting and fire data is incomplete; an absence of these data does not mean that the forest is old growth.
- Historical data (pre-2010) is unreliable and may be incomplete.
- Historical data has been collected at a range of spatial resolutions (eg 1:250k) and is only reliable at that scale.
- In some cases, harvesting and fire data is assigned to whole compartments and does not reflect the actual extent.
- The data provided is a reasonable representation at the landscape scale (1:100k or greater). It may be inappropriate to use older data (pre-2010) at scales less than this.

Persons accessing the information or data who require confirmation of any information or data should refer to FCNSW.

Any use of the data must acknowledge the limitations identified above.

FCNSW does not accept responsibility for any loss or damage occasioned by use of the information or data. While FCNSW will make reasonable efforts to ensure the availability and integrity of its information and data, it cannot guarantee that these will always be available, and/or free of any defects. Users should take this into account when accessing the information and data resources. All access and use is at the risk of the user.
