Lineage

Polygons mapped on to aerial photograph overlays at 1:25000 scale. These polygons were transferred onto a 1:25000 scale topographic map and digitised on screen using MapInfo GIS. Polygon layer was converted into an ArcView shapefile and Cleaned using Edit Tools Extension Version 3.1b. Attributes were added. All polygons checked at approx 1:10000 scale post cleaning to identify any sliver polygons or gaps. These were subsequently removed.
