

Title	Cape Byron vegetation mapping - pre1750
Alternative title(s)	cape_byron_pre1750_VISmap_3805
Abstract	The pre-1750 vegetation of Cape Byron State Recreation Area and Arakwal National Park was estimated and mapped to the level of sub-formation where possible.

Lineage	A preliminary map was derived from mapping extant remnant subformations in areas with little or no evidence of modern anthropogenic disturbance, and the extrapolation of derived subformations to more disturbed areas with similar environmental characteristics (ie; soil, aspect, elevation and drainage). The derived subformation distributions were then refined using the following methods as appropriate: 1. interpretation of historical aerial photographs 2. identification of remnant indicator species 3. assessment of known fire response characteristics of component species 4. assessment of dispersal mechanisms of component species 5. assessment of modern disturbance history
