| Title   | NSW Property Web Service   |
|---|--|
| Abstract  | The NSW Property web service provides access to a polygon feature class that spatially<br>represents an aspatial property description as provided by the Valuer Generals<br>Department in their ValNet database. The property features provided through this web<br>service includes:<br>• Large Rural Property<br>• Rural Property<br>• Semi-Rural Property<br>• Urban Property<br>The available attributes for point queries are:  |
|   | <ul> <li>Address string</li> <li>House Number</li> <li>PropID No labels are displayed.</li> </ul>  |
|   | NOTE: Please contact the Customer HUB <u>https://customerhub.spatial.nsw.gov.au/</u> for advice on datasets access.  |

| PDF Data  | Name: PDF Data Quality Statement - NSW Property Web Service  |
| Quality<br>Statement -<br>NSW Property<br>Web Service | Protocol: WWW:DOWNLOAD-1.0-httpdownload  |
|   | Description:   |
|   | The Data Quality Statement is for users to understand how a particular dataset could<br>be used and whether it can be compared with other, similar datasets. It provides a<br>description of the characteristics of the data to help the user decide whether the data<br>will be fit for their specific purpose (ICT Strategy, NSW Government accessed 23rd May<br>2016)   |

| <u>Property Web</u><br><u>Service</u>                 | Protocol: WWW:DOWNLOAD-1.0-httpdownload  |
| Service   | Description:   |
|   | Web Map Service (WMS) is a standard protocol for serving georeferenced map images<br>over the internet that are generated by a map server using data from a GIS Database<br>(NSW Government - Spatial Web Services Register June 2015). WMS allows a user to<br>spatially visualise the dataset, but not query its features. This service is aimed at<br>advanced geographical information users, and will require access to geographical<br>information system (GIS) software such as QGIS and ArcGIS/ArcMap. |
|   | Function: download   |

| <u>SERVICE - NSW</u><br>Property Web                      | Protocol: WWW:DOWNLOAD-1.0-httpdownload  |  |  |  |
| Service   | Description:   |  |  |  |
|   | An ArcGIS Server web service represents a GIS resource—such as a map, locator, or<br>image—that is located on an ArcGIS Server site and is made available to client<br>applications. Depending on the layers enabled, this web service allows a user to query<br>its features and/or visualise the dataset. This service is aimed at advanced<br>geographical information users, and will require access to geographical information<br>system (GIS) software such as ArcGIS/ArcMap.<br>Function: download |  |  |  |
