

<b>Title</b>	Vegetation Structure and Recruitment Data
<b>Abstract</b>	<p>These data were collected as part of the <a href="#">NSW Grazing Study</a>. An assessment of vegetation structure and recruitment conducted at each of the 451 sites using variable belt transects.</p> <p>To determine tree density all mature trees were enumerated within a 200m x 1-10m (variable width) belt transect. Mature trees were enumerated into four DBH classes (5-10cm, 10-20cm, 20-30cm, &gt;30cm). Woody (tree and shrub) recruitment was enumerated within a 200m x 1-10m (variable width) belt transect into two classes (0.5m -1.3m and 1.3 - 3m).</p>
