Lineage

Lineage: Site data collated from Eden CRA. Model updated from Eden CRA to in response to new qualitative information and comments.

Positional accuracy: Within 50 m (topographic) drainage and ridge features

Attribute accuracy: Field checking by NPWS and SFNSW Independent data set used for accuracy quantification.

Logical consistency: Modelling approach agreed to by expert working group. Decision tree model and map reviewed by SFNSW and NPWS experts. All model data based on species cover/abundance except for Wadbilliga NP where only presence/absence data were available.

Completeness: Entire area covered.
