

<b>Title</b>	Greater Sydney Region Tree Canopy to Modified Mesh Block 2019
<b>Abstract</b>	<p>The Greater Sydney Region Tree Canopy to Modified Mesh Block 2019 provides both an area and percentage of canopy for city blocks and infrastructure corridors in the Greater Sydney Region as of 2019. With this dataset users can estimate tree canopy for many geographic areas (map scales), from larger local government area and precincts down to mesh block (ABS) and modified mesh block (smallest scale). Having current and accurate estimates of tree canopy supports citizens and governments to reliably identify areas of tree canopy and confidently develop urban greening and heat island mitigation strategies and actions. This dataset provides the user with information at a known spatial accuracy. The dataset uses vegetation information derived from 2m resolution Geoscape © <a href="#">Surface Features</a> data (commercial product) combined with boundary and land use information from the Australian Bureau of Statistics (ABS) Mesh Block polygon dataset. Mesh Block data is augmented with boundaries (road, rail, property &amp; water) from the NSW Digital Cadastral Database and NSW Land Zoning to produce modified mesh block boundaries the ABS Mesh Blocks.</p> <p>The modified mesh block are designed to assist the planning of tree planting based on land use. The work was undertaken to support the NSW Government Greener City Program and 2021 <a href="#">Government Priority of One Million trees project</a>.</p>

[Workflow for assessing tree canopy cover in the Greater Sydney Region \(2019\) Nov 2022](#)

Name: Workflow for assessing tree canopy cover in the Greater Sydney Region (2019) Nov 2022

Protocol: WWW:DOWNLOAD-1.0-http--download

Description:

This document offers a workflow (method) used for the 2019 assessment of tree canopy cover in the Greater Sydney Region. The assessment of current tree canopy is a key component of the NSW Greening our City Premier's Priority, the aim of which is to increase the tree canopy and green cover across Greater Sydney by planting one million trees by end of 2022. This is part of a broader commitment to plant five million trees by 2030.

<b>Lineage</b>	The tree canopy by mesh block data is source from the commercial Geoscape © product ' <a href="#">Geoscape Trees</a> ' and analysed with <a href="#">Australian Bureau of Statistics Mesh Blocks</a> , <a href="#">NSW Cadastre</a> , <a href="#">NSW Suburbs and Local Government areas</a> plus the <a href="#">NSW Land Zoning</a> datasets.

Limitations on public access

Scope dataset

#### DQ Completeness Commission

Effective date 2021-10-29

Explanation In the GIS workflow for creating the modified mesh blocks some mesh block may have had sliver of areas added in the alignment and splitting with the NSW Cadastre and Zoning datasets. There are inherited commission errors from input datasets, documented in the published workflow .

#### DQ Completeness Omission

Effective date 2021-10-29

Explanation In the GIS workflow for creating the modified mesh blocks some mesh block may have had sliver of areas removed in the alignment and splitting with the NSW Cadastre and Zoning datasets. There are inherited omission errors from input datasets, documented in the published workflow .

#### DQ Conceptual Consistency

Effective date 2021-10-29

Explanation The data set have cluster tolerances that are consist with source NSW Cadastre. With any areas consistent with the source at the time of use.

#### DQ Topological Consistency

Effective date 2021-10-29

Explanation Data through out the process of the creation of modified mesh blocks was checked for overlapping polygons, duplicate nodes and gaps.

#### DQ Non Quantitative Attribute Correctness

Effective date 2021-10-29

Explanation The attributes were checked for null and invalid values.
