

Title	Historic Woody Vegetation Mapping of the NSW Wheat-belt VIS_ID 1608
Alternative title(s)	Narromine80_wheatbelt_VISmap_1608
Abstract	<p>Historic (1972-78) remnant native woody vegetation of the wheat-belt is mapped and described. Vegetation boundaries delineated on 1:100,000 orthophoto map sheets and digitised to produce vegetation maps for the wheat-belt of NSW. The study area extends from the Western Division boundary to the 300m contour west of the Great Dividing Range and between Latitudes 29° 00' S and 34° 00' S. Stand alone dataset</p> <p>VIS_ID 1608</p> <p>ANZNS0208000147</p>

Lineage	Remnant native vegetation boundaries defined by use of 1:00,000 orthophoto maps and digitised using Environmental Resource Mapping System (E-RMS). The Title Field describes the vegetation category.
Limitations on public access	

Scope	dataset
DQ Completeness Commission	
Effective date	2009-01-10
Explanation	Native vegetation defined as 5 percent crown cover. Where cover 5 percent, remnants were visited in the field before mapping. Treeless remnants only mapped where observed in the field.
DQ Completeness Omission	
Effective date	2009-01-10
Explanation	Limited ground truthing possible as much of the vegetation has been cleared, remnants correlated with existing digital data. Treeless remnants only mapped where observed in the field. Remnants less than 10Ha were not mapped.
DQ Conceptual Consistency	
Explanation	Consistent with cultural (roads) and physical (rivers and dams) attributes at the 1:100 000 map scale.
DQ Topological Consistency	
Explanation	Checked for missing attributes The GIS package ERMS was used to do a topological consistency check to ensure all polygons are closed, nodes are formed at intersection of lines, all polygons are labelled once and there are no duplications. After capture, the coverage was checked against original air photomapping and errors corrected.
DQ Absolute External Positional Accuracy	
Explanation	Very high degree of accuracy at the 1:250 000 scale. Based on extensive ground truthing at the 1:100 000 scale, objective classification using PATN on 1200 sites and Air photo interpretation.
