| Title | Lachlan Valley NP - Kiacatoo Section Vegetation 2017. VIS_ID 4766 |
| Alternative title(s) | LachlanValley_Kiacatoo_E_4766 |
| Abstract | Vegetation community mapping for Lachlan Valley National Park - Kiacatoo Section by John Hunter, 2017. A Northern Inland NPWS Branch contract. Mapped at 1:25000 scale. Two Plant Community Types are defined based on similarity classification (SIMPER) of 49 full floristic and rapid assessment sites. These two communities were mapped based on ground truthing, satellite image analysis and landform. VIS_ID 4766 |

Lineage

Previous vegetation studies were reviewed and floristic site data obtained. The study area was stratified using landscape features and sampled accordingly. Dominant diagnostic species were used to allocate sites to Plant Community Types (PCTs). Also SIMPER analysis was used to identify the species driving differences between selected groups. Site locations, ADS40 imagery and topographical information were used to delineate the boundaries between PCTs.
