

Title	Natural Vegetation of the Burragorang 1:100000 map sheet VIS_ID 2344
Alternative title(s)	Burragorang_rbg_VISmap_2344
Abstract	<p>Description of 31 vegetation map units on the Burragorang 1:100,000 topographic map sheet south west of Sydney. Floristics and conservation status also included. The composition and extent of the present natural vegetation on the Burragorang 1:100,000 map sheet 8929 mapped and described in terms of structure and characteristic species. Stand alone dataset. Vegetation codes are compatible with other RBG 1:100,000 mapping.</p> <p>VIS_ID 2344</p> <p>ANZNS0263000195</p>

Code	2d7fed3a-f21e-4cd0-91da-20b69900a137
Presentation form	Map digital
Edition	unknown
Dataset language	English
Metadata standard	
Name	ISO 19115
Edition	2016
Dataset URI	https://datasets.seed.nsw.gov.au/dataset/2d7fed3a-f21e-4cd0-91da-20b69900a137
Purpose	Vegetation Mapping
Status	Completed
Spatial representation	
Type	vector
Geometric Object Type	curve

Geometric Object Count 1

Spatial reference system

Code identifying the spatial reference system 4283

Equivalent scale 1:None

Topic category

Lineage

Vegetation mapped from aerial photographs and ground truthed. Final copy published Cunninghamia 4(2): 143-215, in 1995 at scale of 1:100,000. Digitising completed 1997 using ERMS GIS, errors corrected using ERMS prior to conversion to ArcView shapefile. Estimated Precision: 75m to 100m. Determination: Linework unseen, estimate based on errors in RBG GIS data created by same methodology. The label field indicates the vegetation classifications included in the mapping. These have been interpreted from aerial photographs, ground truthed and described by botanists and professionals from the Royal Botanic Gardens. The GIS package ERMS was used to do a topological consistency check to ensure all polygons are closed, nodes are formed at intersection of lines, all polygons are labelled once and there are no duplications. After capture, the coverage was checked against original air photomapping and errors corrected. A final error percentage of,1% was recorded. The dataset is complete with reference to range and field verification.

Limitations on public access

Scope dataset

DQ Completeness Commission

Effective date 2009-01-10

DQ Completeness Omission

Effective date 2009-01-10

DQ Topological Consistency

Explanation Checked for missing attributes All attributes were checked. The GIS package ERMS was used to do a topological consistency check to ensure all polygons are closed, nodes are formed at intersection of lines, all polygons are labelled once and there are no duplications. After capture, the coverage was checked against original air photomapping and errors corrected. A final error percentage of less than 1% was recorded.
