

Name of dataset or data source:

NSW National Parks and Wildlife Service (NPWS) All Managed Land

Custodian of the dataset or data source:

Dep Sec National Parks & Wildlife Service

Description:

The NSW National Parks and Wildlife Service (NPWS) All Managed Land dataset combines following four separate NPWS datasets:

- NPWS Estate
- Land Vested in NPW Act Minister - acquisition of land for reservation
- Land Vested in NPW Act Minister - acquisition of land for management and other purposes
- NPWS Managed Land Other

This combined dataset is for reporting purposes when it is deemed necessary to include all of the land that is managed by NSW National Parks and Wildlife Service.

Area hectares of each polygon have been generated in this dataset to assist reporting. Please note that the GIS area calculation was performed using Lamberts Conic Conformal (LCC) projection. This GIS calculated area will not be the same as the gazetted area or acquired area.

The following is the description of layers included:

- The NSW National Parks and Wildlife Service (NPWS) Estate database provides information on areas reserved under the NP&W Act 1974. Areas include National Parks, Nature Reserves, Regional Parks, State Conservation Areas, Aboriginal Areas, Historic Sites and Karst Conservation Reserves.
- Land Vested in NPW Act Minister - acquisition of land for reservation - Boundaries of areas in NSW which are vested in the Minister administering the National Parks and Wildlife Act 1974 under Part 11. The majority of lands included in this dataset are acquired by the NSW NPWS but not yet gazetted as formal reserve. This dataset is known internally as NPWS Acquired Not Gazetted.
- Land Vested in NPW Act Minister - acquisition of land for management and other purposes - Boundaries of areas in NSW which are vested in the Minister administering the National Parks and Wildlife Act 1974 under Part 11. This dataset contains all other vested lands that are not included in the NPWS Vested For Reservation dataset. This dataset includes access roads, workshops, depots, accommodation, offices, leasehold land, and land pending decision or disposal.
- NPWS Managed Land Other - Boundaries of other land in NSW which are under the management of the NSW NPWS. Areas include Crown land under licence to NPWS, Crown Reserve managed by NPWS, Flora Reserve managed by NPWS, and Enclosure Permit held by NPWS. This dataset is known internally as NPWS Managed Land Other.

Additional fields have been added to the attribute table of the merged dataset to assist in determining management responsibilities. These are:

- SOURCE: Source of the individual tenure layer from the above four datasets
- TENURETYPE: Lists different tenure types eg. Reserved, Freehold, Leasehold, Crown land under licence to NPWS, Enclosure Permit held by NPWS, etc
- FIELD_MGT: Lists whether the land is fully managed by

NPWS or whether there are conditions with management. Field management responsibilities are conditional on the terms of the individual lease, licence, permit or management agreement.

For further information or assistance please contact the Land Information Team, Reserve Establishment Unit:
land.information@environment.nsw.gov.au

Data quality rating:

- ★ Institutional Environment - 5
- ★ Accuracy - 5
- ★ Coherence - 5
- ★ Interpretability - 5
- ☆ Accessibility - 3

INSTITUTIONAL ENVIRONMENT

Excellent

- ✓ Does the information have the potential to enhance services or service delivery?
- ✓ The data aligns with the Data Quality Framework, including:
 - Legislation
 - Policies
 - Information Asset Governance
 - Standards
 - Data Management Plans
- ✓ The following governance roles and responsibilities for this asset are clearly assigned:
 - Information Asset Owner
 - Information Asset Custodian
 - Information Steward
- ✓ Data collection is authorised by law, regulation or agreement
- ✓ The Custodial agency has no commercial interest or conflict of interest in the data

ACCURACY

Excellent

- ✓ Data has been subject to a data assurance process (for example: Checking for errors at each stage of data collection and processing, or verifying data entry and making corrections if necessary.)
- ✓ Data is revised and the revision is published if errors are identified
- ✓ There are no known gaps in the data or if there are gaps (for example: non-responses, missing records, data not collected), they have been identified in caveats attached to the dataset.
- ✓ No changes have been made or other factors identified (for example: weighting, rounding, de-identification of data, changes or flaws in data collection or verification methods) that could affect the validity of the data; or any changes/factors have been identified in caveats attached to the asset.
- ✓ The data collection met the objectives of the primary user. The data correctly represents what it was designed to measure, monitor or report.

COHERENCE

Excellent

- ✓ Standard definitions, common concepts, classifications and data recording practices have been used.

✓ Elements within the data can be meaningfully compared.

✓ This data is generally consistent with similar or related data sources from the same discipline

✓ The data can be analysed over time (for example, there have not been any significant changes in the way items are defined, classified or counted over time).

✓ The data does not form part of a collection or, if it is the latest in a series of data releases, there have not been any changes in methodology or external impacts since the last data release.

INTERPRETABILITY

Excellent

✓ A data dictionary is available to explain the meaning of data elements, their origin, format and relationships

✓ Information is available about the primary data sources and methods of data collection (e.g. instruments, forms, instructions).

✓ Information is available to help users evaluate the accuracy of the data and any level of error

✓ Information is available to explain concepts, help users correctly interpret the data and understand how it can be used

✓ Information is available to explain ambiguous or technical terms used in the data

i Find out more about the data dictionary from the Custodian (contact details below).

i Find out more about the primary data sources and methods of data collection from the Custodian (contact details below).

i Find out more about concepts used in this dataset and how to understand or interpret the data from the Custodian (contact details below).

i Find out more about ambiguous or technical terms used in the data from the Custodian (contact details below).

ACCESSIBILITY

Good

✓ Data is available online with an open licence

✓ Data is available in machine-processable, structured form (e.g. CSV format instead of an image scan of a table)

✓ Data is available in a non-proprietary format (e.g. CSV, XML)

✗ Data is described using open standards (e.g. RDF, SPARQL) and persistent identifiers (URIs or DOIs)

✗ Data is linked to other data, to provide context (e.g. employee ID is linked to employee name or species name is linked to genus)

DATA DISCLAIMER

You must check and comply with the licensing conditions for the information you wish to use. This may require you to contact the Department of Planning and Environment (DPE), or other custodial agency, or the third party copyright owner for permission to use the material. You may also use any material in accordance with rights you may have under the [Copyright Act 1968](#) (Cth), for example under the fair dealing provisions or statutory licences. Use of material in a way not permitted by this copyright notice may be an infringement of copyright. Infringing copyright may expose you to legal action by, and liability to, the copyright owner. Wherever a third party holds copyright in material, the copyright remains with that party. Their permission may be required to use the material and you should contact that party directly. As far as practicable, material for which the copyright is owned by a third party will be clearly labelled. Excluded material can only be used under the specific terms of use attached to that material. If you want to use this material in a manner that is not covered by those specific terms of use, you must request permission from the copyright owner of the material.

DPE endeavours to make sure that information provided is correct at the time of its publication. However, as necessary you

should obtain independent advice before making any decision based on the information. The information is made available on the understanding that custodial agencies and the State of NSW accept no responsibility for any damage, cost, loss or expense incurred by you as a result of:

- any error, omission or misrepresentation in the information provided
- without limiting the above, any delay, failure or error in recording, displaying or updating information, including but not limited to, data relating to credit holdings.

Custodial agencies and the State of New South Wales disclaim all responsibility and all liability (including without limitation, liability in negligence) for all expenses, losses, damages and costs you might incur as a result of the information being inaccurate or incomplete in any way, and for any reason.

Understanding the Data Quality Statement

The data quality statement aims to help you understand how a particular dataset could be used and whether it can be compared with other, similar datasets. It provides a description of the characteristics of the data to help you decide whether the data will be fit for your specific purpose.

The Data Quality statement is prepared by the data custodian (provider of the dataset), using a questionnaire that has been developed in accordance with the NSW Government Standard for Data Quality Reporting.

About the quality rating:

The reporting questionnaire asks five questions for each of these data quality dimensions:

- Institutional Environment
- Accuracy
- Coherence
- Interpretability
- Accessibility

For each question: "yes" = 1 point; "no" = 0 points

The number of points determines the Quality Level for each dimension (high, medium, low).

Only dimensions with four or five points receive a star.

Points	Quality Level	Star / No Star
0	Poor	No Star
1	Poor	No Star
2	Fair	No Star
3	Good	No Star
4	Very Good	Star
5	Excellent	Star

Evaluating data quality

Quality relates to the data's "fitness for purpose". Users can make different assessments about the data quality of the same data, depending on their "purpose" or the way they plan to use the data.

The following questions may help you evaluate data quality for your requirements. This list is not exhaustive. Generate your own questions to assess data quality according to your specific needs and environment.

- What was the primary purpose or aim for collecting the data?
- How well does the coverage (and exclusions) match your needs?
- How useful are these data at small levels of geography?
- Does the population presented by the data match your needs?
- To what extent does the method of data collection seem appropriate for the information being gathered?
- Have standard classifications (eg industry or occupation classifications) been used in the collection of the data? If not, why? Does this affect the ability to compare or bring together data from different sources?

- Have rates and percentages been calculated consistently throughout the data?
- Is there a time difference between your reference period, and the reference period of the data?
- What is the gap of time between the reference period (when the data were collected) and the release date of the data?
- Will there be subsequent surveys or data collection exercises for this topic?
- Are there likely to be updates or revisions to the data after official release?
