Title	NSW Council Roadside Reserves Conservation Values
Abstract	Local Government NSW (LGNSW), as part of the Council Roadside Reserves (CRR) Project funded by the NSW Environmental Trust, facilitated the assessment of the conservation value of roadside reserves in a number of NSW Local Government Areas (LGAs) using a standard Rapid Assessment Method (RAM). This line spatial dataset contains the results of the assessments completed by 18 LGAs.
	Conservation value is described as either:
	<ul> <li>High Conservation Value (HCV),</li> <li>Medium Conservation Value (MCV), or</li> <li>Low Conservation Value (LCV).</li> </ul>
	LGNSW facilitated the assessment of roadside reserves in a number of NSW Local Government Areas (LGAs) using a standard Rapid Assessment Method (RAM). The LGAs who undertook the assessment, and are included in the spatial data set, are:
	<ul> <li>Bellingen Shire Council</li> <li>Blacktown City Council</li> <li>Edward River Council</li> <li>Glen Innes Severn Shire Council</li> <li>Griffith City Council</li> <li>Lockhart Shire Council</li> <li>Moree Plains Shire Council</li> <li>Moree Plains Shire Council</li> <li>Muswellbrook Shire Council</li> <li>Oberon Council</li> <li>Parkes Shire Council</li> <li>Penrith City Council</li> <li>Port Stephens Council</li> <li>Queanbeyan-Palerang Regional Council</li> <li>The Hills Shire Council</li> <li>Upper Hunter Shire Council</li> <li>Upper Hunter Shire Council</li> <li>Wagga Wagga City Council</li> <li>Wagga Wagga City Council</li> <li>This spatial dataset contains the results of the assessments completed by 18 LGAs. This assessment describes conservation value as either High Conservation Value (HCV), Medium Conservation Value (MCV) or Low Conservation Value (LCV).</li> <li>The RAM utilised for the assessment was prepared by NSW Local Land Services (LLS), the Office of Environment and Heritage (OEH) and LGNSW and is available at https://www.lgnsw.org.au/files/imce-uploads/581/Final%20RAM_Feb%202018.pdf.</li> <li>Further details are available at</li> <li>https://www.lls.nsw.gov.au/_data/assets/pdf_file/0017/801161/rapid-assessment-methodology.pdf.</li> </ul>

number of data sets prov		side Reserves Conservation Values data set is a compilation of a ovided by the 18 LGAs included in the assessment. Data provided cluded point data sets, line data sets and polygon data sets.
	based on the informati (Bellingen Shire Counci Moree Plains Shire Cou	a provided it was decided that a single line data set would be created on provided. For those LGAs who provided data as a line data set I, Blacktown City Council, Edward River Council, Griffith City Council, ncil, Parkes Shire Council, Penrith City Council, Snowy Valleys Council ncil) the data provided was accepted without modification.
	Queanbeyan-Palerang depicting conservation slivers that were not as	ovided data as a polygon data set (Glen Innes Severn Shire Council, Regional Council and Temora Shire Council) the polygon layers value were used to clip a road data set for the LGA. Small road ssessed were then removed manually from the layer, and a assigned manually based on the original polygon data classification.
	Shire Council, Oberon ( Wagga Wagga City Cou LGA at the start and er applied to each assess	ovided data as a point data set (Lockhart Shire Council, Muswellbrook Council, Port Stephens Council, Upper Hunter Shire Council and uncil) the point locations were used to split the road data sets for each ad point for each roadside reserve assessment. A buffer of 30 m was ment point due to potential inaccuracies in the GPS location of the aservation value was then assigned manually based on the original n.
