Title	NSW State of the Catchments 2008: MER Native Vegetation Theme
Alternative title(s)	NSW SoC Native Vegetation (2008-v1)
Abstract	All four data layers were derived by integrating spatial data from other existing state-wide data sets and applying a series of transparent decision rules. The integration of existing state-wide data sets compiled from several programs delivers decision makers within NSW a powerful and comprehensive snapshot of the native vegetation resource condition with a state-wide context. Additional description of the data layers, the component data sets used to derive them, and the methods used to integrate these component data sets can be found in DECC (2009) Technical Background Report NSW State of the Catchments 2008:Native Vegetation. Unpublished.; ; CAVEATS: SoC report products are not available until the release of the 2009 State of the Environment Report. The data sets described herein have been derived from interim products prepared by the NSW Department of Environment and Climate Change and Water's Native Vegetation Extent and Land Use Mapping Programs. While these products represent the best available state-wide estimate of native vegetation extent and condition at present, they will continue to be improved over time. Caveats applying to the underlying data sets also apply to the State of the Catchment products.

Unique resource identifier

Code	c4e21d89-39db-484c-9ccd-10b2657f024e

Presentation form	Document digital
Edition	1
Dataset language	English

Metadata standard

Name	ISO 19115
Edition	2016

Dataset URI	https://datasets.seed.nsw.gov.au/dataset/c4e21d89-39db-484c-9ccd-10b2657f024e
Purpose	state-wide spatial data layers developed for NSW State odf Catchment reports, 2008
Status	Completed
Spatial representation	grid

type	
Spatial reference system	
Code identifying the spatial reference system	4283
Spatial resolution	10 m
Additional information source	Additional metadata can be obtained from: Dillon,M. et al (2009). Technical Background Report NSW State of the Catchments 2008: Native Vegetation.;;***Key Layers and Attributes***;;andquot;veg_ext_nsw_1 andrdquo; attributes include RowID; VALUE; COUNT. Lineage	Dataset lineage for Vegetation Extent, Vegetation Condition and Pressures affecting native vegetation were derived by integrating spatial data from other existing state-wide data sets and applying a series of transparent decision rules. The component data sets used to derive them, and the methods used to integrate these component data sets can be found at DECC (2009) Technical Background Report NSW State of the Catchments 2008:Native Vegetation. Unpublished Report The state-wide vegetation extent layer was compiled from two primary sources:; ; NSW Extant Native Vegetation (Keith and Simpson 2006) - Version 002. (ANZLIC Metadata No. ANZNS0208000230); NSW Interim Native Vegetation Extent (2008-v1) (ANZLIC Metadata No: ANZNS0208000244), herein referred to as INVE; The state-wide vegetation condition and pressure layers were compiled from primary data sets:; ; Merged Land Use Layer produced as a secondary product INVE (ANZLIC Metadata No: ANZNS0208000244); NSW National Parks and Wildlife Service (NPWS) Estate 2008 v1 (ANZLIC Metadata No: ANZNS0208000008); Forests NSW Estate (SF) 2008 and NSW Travelling Stock Reserves 2008.

Limitations on public access	

Scope	dataset

DQ Completeness Commission

Effective date	2001-01-01

DQ Completeness Omission

Effective date	2001-01-01
Explanation	Extent, Pressure and Condition covers almost all of NSW, except for Sydney and other small areas where land use data are currently unavailable. Off shore islands are not covered.

DQ Conceptual Consistency

Effective date	1900-01-01
Explanation	Data exist as co-registered raster datasets. Only simple attribute structure, with field; VALUE; and commonly used to describe Vegetation Extent cell values; field; PRESSURE_SoC; used to describe Pressure and field; CONDITION_SoC; commonly used to describe Vegetation Condition cell values.

DQ Topological Consistency

Effective date	1900-01-01
Explanation	Checked for missing attributes All attributes were checked

DQ Absolute External Positional Accuracy

Effective date	1900-01-01
Explanation	not known

DQ Non Quantitative Attribute Correctness

Effective date	1900-01-01
Explanation	not known
