Title	Transitional native vegetation regulatory (NVR) map - category 2-sensitive regulated land
Alternative title(s)	Sensitive Regulated Land

| Abstract | The transitional NVR map - category 2-sensitive regulated land layer is a component of the transitional NVR map. The transitional NVR Map was prepared by Department of Planning and Environment (DPE) under Part 5A of the Local Land Services Act 2013 (LLS Act) and supporting Local Land Services Regulation 2014.

The 2022 annual review of the transitional NVR map was published on 23 March 2022. Please read below for details about changes occurring as a result of the 2022 annual review. The latest version of the map can be viewed online using the transitional NVR map viewer.

https://www.lmbc.nsw.gov.au/Maps/index.html?viewer=NVRMap

Section 108 of the Local Land Services Regulation 2014 states that the NVR map designates category 2-sensitive regulated land as a sub-category of category 2-regulated land and lists the types of land to be included.

Datasets compiled to generate the category 2-sensitive regulated land layer include those identifying land that:

- has been declared as a Ramsar wetland (Environment Protection and Biodiversity Conservation Act 1999)

- is under a private land conservation agreement

- is Coastal Wetland or Littoral Rainforests mapped under State Environmental Planning Policy (Coastal Management) 2018

- is native vegetation required to be retained within forestry plantations under the Plantations and reafforestation Act 1999

- is an offset under a property vegetation plan or other approval

- is a set-aside under the Land Management (Native Vegetation) Code 2018 or under the Native Vegetation Regulation 2013.

- is an approved conservation measure as part of a Biodiversity Certification of land under Part 8 of the Biodiversity Conservation Act 2016.

- contains critically endangered ecological communities or plants

- is considered to be core koala habitat under an approved Koala Plan of Management

- is subject to a remedial action or;

- was mapped as old-growth forest or rainforest under the Comprehensive Regional Assessment undertaken for the Regional Forest Agreements.

The inclusion an/or update of these layers on the NVR map requires the approval of the Secretary DPIE or delegate.

Changes to the mapping of category 2-sensitive regulated land introduced in the publish of the transitional NVR map on 23 March 2022 included:

- additions to category 2 – sensitive regulated land of set-aside areas approved between February 2021 and October 2021 under the Land Management (Native Vegetation) Code 2018

- Critically Endangered Plants – Refinements to mapping of some critically endangered plants.

- Private Native Forestry Old Growth Forest and Rainforest – Updates to mapping of Old Growth Forest and Rainforest via private native forestry code approvals under Part 5B or land holder- initiated reviews under Part 5A of the Local Land Service Act 2013.

- Property Vegetation Plans – Updates to term incentive property vegetation plans (PVP) agreements under the Native Vegetation Act 2003, for which the term has expired.

- Biodiversity Conservation Trust agreements – Refinements of, and updates to conservation agreements managed by the NSW Biodiversity Conservation Trust. |

The data is provided as multi value raster that identifies the category 2-sensitive regulated land, category 2-vulnerable regulated land and where category 2-sensitive and category 2-vulnerable regulated land overlaps.

Pixel values:

3 - category 2-vulnerable regulated land

4 - category 2-sensitive regulated land

6 - Where category 2-sensitive and category 2-vulnerable regulated land overlap (display class)

Spatial datasets compiled in the category 2-sensitive regulated land layer are sourced from Department Planning and Environment, Environment Protection Authority, Biodiversity Conservation Trust, Department of the Environment and Energy and NSW Local councils.

Data on the transitional NVR viewer is updated on a monthly basis for Landholder minor data changes. https://www.lmbc.nsw.gov.au/Maps/index.html?viewer=NVRMap

Presentation form	Image digital

Edition	11

Dataset language	English

Metadata standard

Name	ISO 19115
Edition	2016

Dataset URI	https://datasets.seed.nsw.gov.au/dataset/c0ec02c4-ba23-4cef-b088-dd20b9eb9e03
Purpose	Legislative and regulatory requirements
Status	Completed
Spatial representation type	grid
Spatial reference system	
Code identifying the spatial reference system	4283
Spatial resolution	25000 m
Additional information source	This dataset incorporates a number of prescribed information sets from a variety of sources of varying dates. The wide temporal coverage reflects the range of source data used in the map method.
