

<b>Title</b>	Preclearing Vegetation Mapping of the Brewarrina Shire, Northern Floodplains, Far Western New South Wales VIS ID 1659
<b>Alternative title(s)</b>	Brewarrina_Pre_VISmap_1659
<b>Abstract</b>	<p>Preclearing Vegetation Mapping of the Brewarrina Shire, Northern Floodplains, Far Western New South Wales, Edition 3. The vegetation communities of the north eastern section of Bourke Shire is a dataset that contains information about the distribution and status of existing and preclearing vegetation communities within the Northern Floodplains of Western NSW. The data was compiled to assist the community in the management of Native Vegetation through Regional Vegetation Management plans. The attribute data contains information on Floristics, Existing and Preclearing Vegetation Communities, Modification types and Regional statistics. The mapping was commissioned by the Northern Floodplains Regional Planning Committee in June 1997, compiled by DLWC Far West Region June 1997-December 2003 and funded by the Natural Heritage Trust, Environment Australia, DLWC and the MBDC NRMS strategy. This data set is one of a set three vegetation map products produced by the Northern Floodplains Regional Planning project. Preclearing and existing vegetation maps for the Western Division section of Walgett Shire and Bourke Shire are also complete and compatible with the Brewarrina map products.</p> <p>VIS ID 1658</p>

<b>Lineage</b>	Native vegetation communities are derived from Murray Darling Basin Commission 1991 M305 digital structural vegetation data showing woody and non-woody canopy cover, upgraded and enhanced through the interpretation of satellite imagery (Landsat TM 1995 and 1996) and supported by field data, field verification, historical references, community consultation and aerial photographs (1975-1998). Some 26 vegetation communities are delineated and described.
