| Title | Repealed - State Environmental Planning Policy No 19-Bushland in Urban Areas |
| Alternative title(s) | SEPP No 19-Bushland in Urban Areas |
| Abstract | <p>This is a repealed State Environmental Planning Policy and has been superseded by the State Environmental Planning Policy (Biodiversity & Conservation) 2021 as part of the Department's initiative to consolidate State Environmental Planning Policies to simplify and provide certainty to the planning system.</p> <p>Click here to go to the State Environmental Planning Policy (Biodiversity & Conservation) 2021 Open Data page: https://www.planningportal.nsw.gov.au/opendata/dataset/state-environmental-planning-policy-biodiversity-conservation-2021</p> <p>Go to the following link to find out more about the new consolidated SEPPs: https://www.planning.nsw.gov.au/Policy-and-Legislation/State-Environmental-Planning-Policies/Consolidated-state-environmental-planning-policies</p> <p>This historical record represents Bushland in Urban Areas for State Environmental Planning Policy.</p> |

| Purpose | <p>(1) The general aim of this Policy is to protect and preserve bushland within the urban areas referred to in Schedule 1 because of:(a) its value to the community as part of the natural heritage,(b) its aesthetic value, and (c) its value as a recreational, educational and scientific resource.(2) The specific aims of this policy are:(a) to protect the remnants of plant communities which were once characteristic of land now within an urban area,(b) to retain bushland in parcels of a size and configuration which will enable the existing plant and animal communities to survive in the long term,(c) to protect rare and endangered flora and fauna species,(d) to protect habitats for native flora and fauna,(e) to protect wildlife corridors and vegetation links with other nearby bushland,(f) to protect bushland as a natural stabiliser of the soil surface,(g) to protect bushland for its scenic values, and to retain the unique visual identity of the landscape, (h) to protect significant geological features,(i) to protect existing landforms, such as natural drainage lines, watercourses and foreshores,(j) to protect archaeological relics, (k) to protect the recreational potential of bushland,(l) to protect the educational potential of bushland,(m) to maintain bushland in locations which are readily accessible</p> |

| | |
|--|----------|
| to the community, and (n) to promote the management of bushland in a manner which protects and enhances the quality of the bushland and facilitates public enjoyment of the bushland compatible with its conservation. | |

| Lineage | This spatial dataset reflects the current planning legislation in NSW in particular the maps and legislation published on the NSW legislation website (www.legislation.nsw.gov.au). The data production usually occurs in conjunction with the development of the Environmental Planning Instrument (EPI) it is connected to. Original data inputs are produced by Local Government or the Department according to map and data standards developed by the Department and published externally via the website. These data inputs are checked by data and cartographic staff as well as planning staff internally against the map and data standards as well as for accurate content. Once the planning instrument is notified, the input data will be incorporated into the relevant EPI datasets. The quality management processes involved in the data production to this point are routinely screened by internal and external auditors for certification under ISO 9001 - Quality Management Systems. At this point the various datasets are then combined into a new normalised data schema to suit the requirements of the online Planning Viewer. This occurs via various automated ETL processes. Although every care is taken in ETL processes to maintain accuracy sometimes differences between inputs and final normalised data can occur. | | |
