Lineage Mapping of veg onto aerial photography at a scale of 1:25000 was conducted by P. Kendall. Photo's & overlay's were scanned as JPEG images, these images were converted to ERS image types so it could be orthorectified within the software ERMapper version 6.1. the overlay images were converted to linework, all editing was conducted within ArcView 3.2 & the extension Edit Tools version 3.1. Linework was converted to polygons & then cleaned to attain final layer. Veg codes were then entered within ArcView 3.2 by editing the attribute table.
