Title	Repealed - State Environmental Planning Policy (Major Infrastructure Corridors) 2020
Abstract	This is a repealed State Environmental Planning Policy and has been superseded by the State Environmental Planning Policy (Transport and Infrastructure) 2021 as part of the Department's initiative to consolidate State Environmental Planning Policies to simplify and provide certainty to the planning system. Click here to go to the State Environmental Planning Policy (Transport and Infrastructure) 2021 Open Data page: https://www.planningportal.nsw.gov.au/opendata/dataset/state-environmental-planning-policy-transport-and-infrastructure-2021 Go to the following link to find out more about the new consolidated SEPPs: https://www.planning.nsw.gov.au/Policy-and-Legislation/State-Environmental-Planning-Policies/Consolidated-state-environmental-planning-policies This historical record represents the State Environmental Planning Policy (Major Infrastructure Corridors) 2020

Data Quality Statement	Name: Data Quality Statement
	Protocol: WWW:DOWNLOAD-1.0-http--download
	Description:
	Data quality statement for State Environmental Planning Policy (Major Infrastructure Corridors) 2020
	Function: download

Unique resource identifier

Code	6c5c2332-32eb-4031-b810-529a67aa1663

Presentation form	Map digital

Edition	1

Dataset language	English

Metadata standard

Name	ISO 19115
Edition	2016

Dataset URI	https://datasets.seed.nsw.gov.au/dataset/6c5c2332-32eb-4031-b810-529a67aa1663

Purpose	The aims of this policy are as follows - a) to identify land that is intended to be used in the future as an infrastructure corridor, b) to establish appropriate planning controls for the land for the following purposes - i) to allow the ongoing use and development of the land until it is needed for the future infrastructure corridor, ii) to protect the land from development that would adversely impact on or prevent the land from being used as an infrastructure corridor in the future.

Status	Obsolete

Spatial representation

Type	vector
Geometric Object Type	solid

Spatial reference system

Code identifying the spatial reference system	4283
Equivalent scale	1:None
Topic category	

Keyword set

keyword value	TRANSPORTATION-Land

Originating controlled vocabulary

Title	ANZLIC Search Words
Reference date	2008-05-16

Geographic location

West bounding longitude	143.245899
East bounding longitude	154.430421
North bounding latitude	-35.80605
South bounding latitude	-28.872769

Vertical extent information

Minimum value	-100
Maximum value	2228

Coordinate reference system

Authority code	urn:ogc:def:cs:EPSG::
Code identifying the coordinate reference system	5711

Temporal extent

Begin position	2020-07-03
End position	N/A

Dataset reference date

Resource maintenance

Maintenance and update frequency	Not planned

Lineage	This spatial dataset reflects the current planning legislation in NSW in particular the maps and legislation published on the NSW legislation website (www.legislation.nsw.gov.au). The data production usually occurs in conjunction with the development of the Environmental Planning Instrument (EPI) it is connected to. Original data inputs are produced by Local Government or the Department according to map and data standards developed by the Department and published externally via the website. These data inputs are checked by data and cartographic staff as well as planning staff internally against the map and data standards as well as for accurate content. Once the planning instrument is notified, the input data will be incorporated into the relevant EPI datasets. The quality management processes involved in the data production to this point are routinely screened by internal and external auditors for certification under ISO 9001 - Quality Management Systems. At this point the various datasets are then combined into a new normalised data schema to suit the requirements of the online Planning Viewer. This occurs via various automated ETL processes. Although every care is taken in ETL processes to maintain accuracy sometimes differences between inputs and final normalised data can occur.
