

Title	South West Woodland NR - Cookamidgera Section Vegetation 2017. VIS_ID 4767
Alternative title(s)	SW_Woodland_Cookamidgera_E_4767
Abstract	Vegetation community mapping for South West Woodland Nature Reserve - Cookamidgera Section by John Hunter, 2017. A Northern Inland NPWS Branch contract. Mapped at 1:25000 scale. Four Plant Community Types are defined based on similarity classification (SIMPER) of 20 full floristic and rapid assessment sites. These four communities were mapped based on ground truthing, satellite image analysis and landform. VIS_ID 4767

Lineage	Previous vegetation studies were reviewed and floristic site data obtained. The study area was stratified using landscape features and sampled accordingly. Dominant diagnostic species were used to allocate sites to Plant Community Types (PCTs). Also SIMPER analysis was used to identify the species driving differences between selected groups. Site locations, ADS40 imagery and topographical information were used to delineate the boundaries between PCTs.
