

Title	Threatened Ecological Communities Greater Sydney
Abstract	<p data-bbox="360 85 1452 257">Map of 35 NSW-listed threatened ecological communities (TECs) within Greater Sydney. The map is derived from a number of best available mapping products and expert input. While the distribution of a number of TECs extends beyond Greater Sydney, their distribution beyond the study area is not represented in this map, with two exceptions: the Blue Mountains Basalt Forest and Pittwater and Wagstaffe Spotted Gum Forest TECs.</p> <p data-bbox="360 280 1452 548">The methodology and scale of best available sources used to derive the map vary, with concomitant variation in currency, coverage, spatial precision and attribution accuracy. There are known gaps in coverage due to the lack of mapping sources in some locations within the study area (including, but not limited to the Grose Valley near Wollangambe, Ebenezer, Cattai, west of Mulgoa and west of Thirlmere). Limitations of this map include: areas not identified as TEC may be TEC, areas identified as TEC may not be TEC, and areas identified as a TEC may be a different TEC. Accordingly, property-scale assessments should inform activities, plans and proposals at the property scale.</p> <p data-bbox="360 571 1452 660">Mapping is updated frequently via expert input. The map data informs the Biodiversity Values Map, Native Vegetation Regulatory Map, Rural Fire Service 10/50 tool and High Environmental Values Greater Sydney map.</p> <p data-bbox="360 683 1452 750">For more information about the map, refer to the report 'Map of threatened ecological communities in Greater Sydney'.</p> <p data-bbox="360 772 742 795">TECs included in this map are:</p> <ul data-bbox="391 817 1452 2161" style="list-style-type: none"> <li>• Agnes Banks Woodland in the Sydney Basin Bioregion</li> <li>• Bangalay Sand Forest of the Sydney Basin and South East Corner bioregions</li> <li>• Blue Gum High Forest in the Sydney Basin Bioregion</li> <li>• Blue Mountains Basalt Forest in the Sydney Basin Bioregion</li> <li>• Blue Mountains Shale Cap Forest in the Sydney Basin Bioregion</li> <li>• Blue Mountains Swamps in the Sydney Basin Bioregion</li> <li>• Castlereagh Scribbly Gum Woodland in the Sydney Basin Bioregion</li> <li>• Castlereagh Swamp Woodland</li> <li>• Coastal Saltmarsh in the NSW North Coast, Sydney Basin and South East Corner bioregions</li> <li>• Coastal Upland Swamp in the Sydney Basin Bioregion</li> <li>• Cooks River/Castlereagh Ironbark Forest in the Sydney Basin Bioregion</li> <li>• Cumberland Plain Woodland in the Sydney Basin Bioregion</li> <li>• Duffys Forest Ecological Community in the Sydney Basin Bioregion</li> <li>• Eastern Suburbs Banksia Scrub in the Sydney Basin Bioregion</li> <li>• Elderslie Banksia Scrub Forest in the Sydney Basin Bioregion</li> <li>• Freshwater wetlands on coastal floodplains of the NSW North Coast, Sydney Basin and South-East Corner bioregions</li> <li>• Hygrocybeae Community of Lane Cove Bushland Park in the Sydney Basin Bioregion</li> <li>• Kurnell Dune Forest in the Sutherland Shire and the City of Rockdale</li> <li>• Littoral Rainforest in the NSW North Coast, Sydney Basin and South East Corner bioregions</li> <li>• Maroota Sands Swamp Forest</li> <li>• Moist Shale Woodland in the Sydney Basin Bioregion</li> <li>• Montane Peatlands and Swamps of the New England Tableland, NSW North Coast, Sydney Basin, South East Corner, South Eastern Highlands and Australian Alps bioregions</li> <li>• O'Hares Creek Shale Forest</li> <li>• Pittwater and Wagstaffe Spotted Gum Forest in the Sydney Basin Bioregion</li> <li>• River-flat Eucalypt Forest on Coastal Floodplain of the NSW North Coast, Sydney Basin and South East Corner bioregions</li> <li>• Shale Sandstone Transition Forest in the Sydney Basin Bioregion</li> <li>• Southern Sydney Sheltered Forest on Transitional Sandstone Soils in the Sydney Basin Bioregion</li> <li>• Sun Valley Cabbage Gum in the Sydney Basin Bioregion</li> <li>• Swamp Oak Floodplain Forest of the NSW North Coast, Sydney Basin and South East Corner bioregions</li> <li>• Swamp Sclerophyll Forest on Coastal Floodplains of the NSW North Coast, Sydney Basin and South East Corner bioregions</li> <li>• Sydney Freshwater Wetlands in the Sydney Basin Bioregion</li> <li>• Sydney Turpentine-Ironbark Forest in the Sydney Basin Bioregion</li> <li>• The Shorebird Community occurring on the relict tidal delta sands at Taren Point</li> <li>• Themeda Grassland on Seacliffs and Coastal Headlands in the NSW North Coast, Sydney Basin and South East Corner bioregions</li> <li>• Western Sydney Dry Rainforest in the Sydney Basin Bioregion</li> </ul>

## Resource locator

### [Data Quality Statement](#)

Name: Data Quality Statement

Protocol: WWW:DOWNLOAD-1.0-http--download

Description:

Data quality statement for Threatened ecological communities Greater Sydney

Function: download

### [Map of threatened ecological communities in Greater Sydney](#)

Name: Map of threatened ecological communities in Greater Sydney

Protocol: WWW:DOWNLOAD-1.0-http--download

Description:

Report summarising the map compilation process and updates.

Function: download

### [ArcGIS REST Service - Threatened Ecological Communities Greater Sydney](#)

Name: ArcGIS REST Service - Threatened Ecological Communities Greater Sydney

Protocol: WWW:DOWNLOAD-1.0-http--download

Description:

An ArcGIS Server web service represents a GIS resource—such as a map, locator, or image—that is located on an ArcGIS Server site and is made available to client applications.

Depending on the layers enabled, this web service allows a user to query its features and/or visualise the dataset.

This service is aimed at advanced geographical information users, and will require access to geographical information system (GIS) software such as ArcGIS/ArcMap.

Function: download

### [WMS - Threatened Ecological Communities Greater Sydney](#)

Name: WMS - Threatened Ecological Communities Greater Sydney

Protocol: WWW:DOWNLOAD-1.0-http--download

Description:

Web Map Service (WMS) is a standard protocol for serving georeferenced map images over the internet that are generated by a map server using data from a GIS Database (NSW Government - Spatial Web Services Register June 2015).

WMS allows a user to spatially visualise the dataset, but not query its features.

This service is aimed at advanced geographical information users, and will require access to geographical information system (GIS) software such as QGIS and ArcGIS/ArcMap.

Function: download

### [Download Package](#)

Name: Download Package

Protocol: WWW:DOWNLOAD-1.0-http--download

Description:

Spatial data and report.

Function: download
