

Title	Vegetation community and river red gum canopy condition map of Murray River Park. VIS_ID 3868
Alternative title(s)	MurrayRiverPark_2010_E_3868
Abstract	Native vegetation mapping of the Murray River National Park (Vic), covering part of Barmah Forest area.; ; This map was prepared to specifically show the spatial delineation of stem density and canopy condition categories of vegetation in the Barmah and Millewa Forest areas. This map was prepared using aerial photo interpretation (API) of ADS40 digital aerial photography captured in 2010. ; ; The map was prepared by updating (linework and attribution) of existing vegetation mapping produced in 2005 by Doug Frood (Frood 2007).; ; Barmah National Park (Vic) and the Murray River Park (Vic) are collectively known as the Barmah Forest. VIS_ID 3868

Purpose	This map is part of a series prepared as part of the Adaptive Management of the NSW /Victorian Riverina River Red Gum Reserves Program coordinated through NSW National Parks & Wildlife (a Division of the NSW Office of Environment and Heritage).;;Maps produced in this series include: ;VIS_ID 3868 Part of the Murray River National Park (Vic) - part of Barmah Forest;VIS_ID 3870 Barmah National Park (Vic) - part of Barmah Forest ;VIS_ID 3869 Murray Valley National Park (NSW) - whole of Millewa Forest;;This project was funded jointly by the Murray Darling Basin Authority, the Victorian Department of Sustainability and Environment, and the NSW Office of Environment and Heritage.
Status	Completed

Lineage

Digital air photo coverage of the study area included Leica ADS-40 imagery captured by NSW Land and Property Management Authority (LPMA) in May 2010, and digital air photos captured by Aerometrex Pty Ltd using an Ultracam D camera in December 2009 and supplied by the DSE Victoria. The ADS-40 imagery was supplied as a 50cm resolution orthorectified, mosaicked and georeferenced product, and included true (blue, green, red) and false colour (near infrared, red, green) composites. Average absolute X, Y accuracy was 0.75m (95% confidence). Imagery from DSE Victoria was supplied as a 30cm resolution orthorectified, mosaicked and referenced (GDA 94 MGA 55) product and included true (red, green, blue) and false colour (Near Infrared, Red, Green) composites. Spatial accuracy was +/- 0.6m RMSE (68% confidence). All images were cloud free.
