

Title	Vegetation communities of the Gwydir Wetlands 2008 and 2015. VIS_ID 4686
Alternative title(s)	Gwydir_2008_15_E_4686
Abstract	<p>The purpose of this study was: (1) to create maps of the distribution of vegetation communities in the Gwydir Wetlands at decadal intervals, (2) to define trends in the condition of key vegetation communities, (3) to establish a series of vegetation plots within key vegetation communities for more detailed floristic survey and as a benchmark for trend analysis, and (4) to interpret the changing extent and condition of vegetation communities.</p> <p>Note that no quantitative accuracy assessment was undertaken in preparing the maps. Map creation relied on expert knowledge of vegetation communities in the region. Refer to the mapping report* for further information on methods and limitations.</p> <p>VIS_ID 4686</p>
