| Abstract  | Vegetation survey and mapping of Warrumbungle National Park in 2008, commissioned by NPWS Narrabri Region. Nine communities were determined based on floristic analysis of 20 x 20 m survey sites, and described using dominant species and structural characteristics. Vegetation communities were mapped using ground truthing, position in landscape and stereo interpretation of aerial photos captured at 1:50,000. Lineage and attribution accuracy are unknown, however some anomalies have been identified by NPWS staff. VIS_ID 4017 |  |  |  |
