

Title	Water Modelling-Modelled Data-Without Development-Castlereagh
Alternative title(s)	Surface water modelling - Castlereagh Valley
Abstract	<p>Time series of modelled daily flow rates in megalitres per day across the NSW river systems - Castlereagh Valley. Individual for each available river gauge data sets are attained via best available at the time of publishing hydrologic model/s and over the historic climate period (usually from early to mid-1890s to a water year previous to the date of publishing). Specific scenario data sets are expected to be updated annually and subject to quality requirements may be used in relevant studies.</p> <p>The naming structure of the individual files is "Gauge number_watercourse@Gauge name".</p>
