Title	Water Modelling-Modelled Data-Without Development-Namoi
Alternative title(s)	Surface water modelling - Namoi Valley
Abstract	Time series of modelled daily flow rates in megalitres per day across the NSW river systems – Namoi Valley. Individual for each available river gauge data sets are attained via best available at the time of publishing hydrologic model/s and over the historic climate period (usually from early to mid-1890s to a water year previous to the date of publishing). Specific scenario data sets are expected to be updated annually and subject to quality requirements may be used in relevant studies. The naming structure of the individual files is "Gauge number_watercourse@Gauge name".
