

Title	Werrikimbe National Park Mooraback Section Vegetation 2003 VIS_ID 4762
Alternative title(s)	WerrikimbeNP_Moorabk_2003_E_4762
Abstract	<p>Werrikimbe National Park (Mooraback Section) vegetation mapping was undertaken by Dr John T. Hunter in 2003 by contract for the NPWS Northern Tableland Region. The Mooraback study area is located within the north east section of Werrikimbe National Park. The study area is bounded in the south by the Werrikimbe Fire Trail. Mooraback study area is within the New England Tablelands Bioregion, the Northern Tablelands Botanical division and the local government areas of the Walcha and Hastings Shires.</p> <p>The vegetation of the Mooraback Study Area is described and mapped (scale 1:25 000). Seven communities are defined, four of which are based on PATN analysis of forests and woodlands and a further three communities are mapped based on information specialised communities. These seven communities were mapped based on ground truthing, air photo interpretation and landform. Two communities are considered endangered and one should be considered vulnerable. Most communities are of open forest structure, although sedgeland, heaths, rainforest, woodlands, and tall open forests also occur. Many of the communities show considerable variation and intergrade along common boundaries and in particular on intermediate soil types or due to past disturbances.</p> <p>VIS_ID 4762</p>

Lineage

The requirements of the investigation were: 1. Collate existing information from previous vegetation surveys conducted within the Mooraback area of Werrikimbe NP. 2. Site placement to be based on selected environmental variables and a more intensive survey of forbs within previously cleared areas. 3. Identify weed species. 4. Identify ROTAP and TSC Act species. 5. Identify regionally significant species. 6. Provide known fire ecology information on species and communities. 7. Construction of a vegetation map. 8. Provide management recommendations. 9. Provide comment on historical importance of previously land use areas.
