

<b>Title</b>	Wetlands of the Lachlan River Catchment vs1.0
<b>Abstract</b>	This regional scale mapping of wetlands in the Lachlan River Catchment was produced to trial methods for Wetland Inventory in NSW. Wetland boundaries were determined by combining existing vegetation mapping with remote sensing analyses of inundation. Wetland attributes were determined using existing mapping and remote sensing datasets. This map is suitable for viewing at 1:50 000. This map is not free from error. Please read the accompanying report to understand data limitations and accuracy.
