

<b>Title</b>	SLATS - Woody Vegetation Change - NSW 2015 and 2016
<b>Abstract</b>	<p>This layer shows woody vegetation change based on the analysis of multi-date SPOT5 and Sentinel2 imagery. This analysis was done for the period 2015 and 2016.</p> <p>Woody change is detected through a combination of automated and manual interpretation of the differences between images captured during summer of each year. Satellite images are selected as close as possible to the 1st of January each year and must have a clear view of the ground not impacted by smoke or cloud cover. This requirement can result in a range of imagery dates being selected for each SLATS year.</p> <p>To reflect this, SLATS data naming previously included both years in which imagery was captured, for example 2015-16.</p> <p>For clarity data is now named using the year in which the majority of the clearing has taken place for example 2015</p> <p>The woody vegetation change is mapped using the SLATS (Statewide Land and Tree Survey) method which applies an automated change analysis process followed by visual interpretation of the results by experienced image interpretation staff. Landcover classes reflect the interpreted cause of woody vegetation change.</p> <p>The woody change data is also used for vegetation compliance analysis.</p> <p>Change statistics are available.</p> <p>Remotely sensed imagery is routinely collected by DPE and used to map vegetation clearing. This data is spatially explicit and can be used with other datasets to identify activity on individual lots. Please read the privacy collection notice for more information.</p>

## Resource locator

### [Data Quality Statement](#)

Name: Data Quality Statement

Protocol: WWW:DOWNLOAD-1.0-http--download

Description:

Data quality statement for SLATS - Woody Vegetation Change - NSW 2015 and 2016

Function: download

### [Privacy Collection Notice](#)

Name: Privacy Collection Notice

Protocol: WWW:DOWNLOAD-1.0-http--download

Description:

Notice that Spatially explicit imagery is routinely collected by the department. Spatially explicit data can be used to identify activity at a property scale.

Function: download

### [Factsheet - Statewide Landcover and Tree Study \(SLATS\)](#)

Name: Factsheet - Statewide Landcover and Tree Study (SLATS)

Protocol: WWW:DOWNLOAD-1.0-http--download

Description:

Useful information about the resource and the method of development/creation.

Function: download

### [SLATS NSW 2015 data package](#)

Name: SLATS NSW 2015 data package

Protocol: WWW:DOWNLOAD-1.0-http--download

Description:

SLATS woody vegetation change derived from multi-date SPOT5 and Sentinel2 imagery (TIF Format)

Function: download

### [SLATS NSW 2016](#)

Name: SLATS NSW 2016 data package

[data package](#)

Protocol: WWW:DOWNLOAD-1.0-http--download

Description:

SLATS woody change derived from multi-date SPOT5 and Sentinel2 imagery (TIF Format)

Function: download

## Unique resource identifier

Code 705a4b7f-f050-4ed0-9041-150eb32dd9ab

Presentation form Image digital

Edition 1

Dataset language English

## Metadata standard

Name ISO 19115

Edition 2016

Dataset URI <https://datasets.seed.nsw.gov.au/dataset/705a4b7f-f050-4ed0-9041-150eb32dd9ab>

Purpose To support the NSW Annual Report on Native Vegetation which is DPIE's comprehensive summary of actions undertaken by private and public land managers to conserve and manage native vegetation. The annual report, which is produced at the end of each calendar year, comprises the Native Vegetation Report Card, the Woody Vegetation Change Report and the Compliance and Enforcement Report Card.

Status Completed

Spatial representation type grid

## Spatial reference system

Code identifying the spatial reference system 4283

Spatial resolution 10 m

Additional information source 2 Distinct datasets - temporal coverage of 1 yr each
